

BACHELOR OF SCIENCE (Honours) PROGRAMME

INTRODUCTION

The Bachelor of Science (Honours) programme was first offered by the School of Distance Education since 1973. It gives the students an option to major in one of the following disciplines:

BIOLOGY
CHEMISTRY
MATHEMATICS
PHYSICS

Every discipline focuses on the areas required in training of human resources that will form the backbone of our nation's development in the fields of science and technology. The programme structure aims at teaching students the basic knowledge required for each discipline in the core courses and supplemented by an array of minor courses.

University Courses are added to provide a holistic aspect to the curriculum, hence balancing the content of the whole programme. Thus it is envisioned that this programme is capable of producing graduates that are knowledgeable, skilful, independent, mature and highly ethical.

PROGRAMME STRUCTURE

All B.Sc. (Hons.) students are required to register as Major-Minor students. The Minor field can be chosen from **within** or **outside** of the Science Programme.

The minimum units required for graduation are as follows:

Core (T)	71/72
Elective (E)	12
Minor (M)	20
University Courses (U)	19

TOTAL	122/*123
	=====

**For major in Physics*

COURSE REGISTRATION

Students must select one **Major** field from Biology/Chemistry/ Mathematics/Physics.
